collecting_society - Administration #260

Identification of Storage

04/09/2017 12:40 AM - Alexander Blum

Status:	Feedback	**Start date:**	
Priority:	Normal	**Due date:**	
Assignee:	Frank Guthausen	**% Done:**	0%
Category:		**Estimated time:**	0.50 hour
Target version:	Repertoire 6) Post Production	**Spent time:**	0.00 hour

Description

At least, as soon, as we use more than one VM-Storage, the storage should be tracked in the database.
I already added a filed hostname for that purpose.
How is VM-Web supposed to access the information, which VM-Storage is mounted in ./storage?

For multiple physical machines we need even more information.
Is an URL enough, or should it be an IP or both?

History

#1 - 04/09/2017 12:50 AM - Alexander Blum

- Tracker changed from Administration to Verarbeitung

#2 - 04/09/2017 12:51 AM - Alexander Blum

- Tracker changed from Verarbeitung to Administration

#3 - 04/09/2017 12:52 AM - Alexander Blum

- Priority changed from Normal to Hoch

- Target version set to 4) Production phase I

#4 - 04/09/2017 12:54 AM - Alexander Blum

- Target version changed from 4) Production phase I to 1) Testing phase I

#5 - 04/09/2017 01:18 AM - Alexander Blum

- Assignee set to Frank Guthausen

#6 - 04/09/2017 01:18 AM - Alexander Blum

- Status changed from Neu to Feedback

#7 - 11/24/2017 09:42 PM - Sarah Stoffels

- Priority changed from Hoch to Normal

- Target version deleted (1) Testing phase I)

Wird erst bei Skalierung benötigt, ist für bereits archivierte Daten im Nachhinein nicht mehr relevant, sondern für das Processing.

#8 - 11/05/2018 03:01 PM - Alexander Blum

- Target version set to 6) Post Production

#9 - 10/08/2019 03:42 PM - Alexander Blum

- Target version changed from 6) Post Production to Repertoire 6) Post Production

#10 - 10/08/2019 03:49 PM - Alexander Blum

- Project changed from repertoire to collecting_society
