I encountered upload errors for several files using the [generated audio demo data](#) (Noise, Flac, 286 MB, CD as 12 Songs) during (not after) upload. I didn't look any deeper.

Also the time intervall reference for the estimated upload rate and time should be bigger - at least for me it switched between low (200 KBit/s, 3 Hours) and high (1 MBit/s, 30 Minutes) values every 2 seconds. This renders the estimates quite useless.

#4 - 06/04/2018 05:32 PM - Alexander Blum

I limited the concurrent uploads to 3. A first try on testrepertore using the demo data worked fine

- 12 x 24 MB flac = 286 MB
- ~53 Min = 0.09 MB/s

Please more tests. We should also coordinate a multiple parallell concurrent upload test.

9 tracks, 3 concurrent, uploaded @20MByte/s. Worked seamlessly. Preview also working again. Ok to go!
