Thomas officially grabbed this ticket now.

This is how I'd like to structure the tabs on the add/edit page:

#### GENERAL

title  
number\_mediums  
ean\_upc\_code  
isrc\_code  
picture\_data  
picture\_data\_mime\_type  
warning

#### PRODUCTION

copyright\_date  
copyright\_owner  
production\_date  
producer

#### DISTRIBUTION

label  
label\_catalog\_number  
release\_date  
release\_cancellation\_date  
online\_release\_date  
online\_cancellation\_date  
distribution\_territory

#### TRACKS

creations

#### GENRES

genres

#### RIGHTS SOCIETIES

neighbouring\_rights\_society

Changed label\_order\_number to label\_catalog\_number.

Open question: Don't we need a *media type* field, e.g. to know if it is the CD or the vinyl release?

**#6 - 05/07/2018 01:52 PM - Thomas Mielke**

- Status changed from *In Bearbeitung* to *Feedback*
- Assignee changed from *Thomas Mielke* to *Alexander Blum*

Need clarification why we have this OR condition:

[https://github.com/C3S/collecting\\_society.portal.repertoire/commit/b1a3c6775c69c879bdc22fb651b416a18c760119#diff-c7361c7a1e931e1ebcf97d50f4b8d541L49](https://github.com/C3S/collecting_society.portal.repertoire/commit/b1a3c6775c69c879bdc22fb651b416a18c760119#diff-c7361c7a1e931e1ebcf97d50f4b8d541L49)

Maybe replace with `entity_creator` like this?:

```
return cls.get().search([
  [
    'OR',
    ('entity_creator', '=', party_id),
    ('creations.creation.artist.party', '=', party_id)
  ],
])
```

**#7 - 05/13/2018 07:35 PM - Thomas Mielke**

Why is `Releases.ean_upc_code` an int? int holds max 9 digits, ean codes need 13, upc codes need 12 digits.

**#8 - 05/13/2018 07:42 PM - Thomas Mielke**

Don't we need an entry form to allow the user to enter mere `party.addresses`?

We need to check, how this number of tabs is displayed on smaller devices.

Sounds reasonable. There was once a whole object for online release, if i remember correctly. This would also be one type to add.

Probably just a thoughtless error.

For what reason?

This is just a relic. It was a short fix to associate releases with the webuser before we got EntityOrigin.

```
('entity_creator', '=', party_id),
```
