Bug in registry cache?

Description There might be a bug in the registry cache. When I fixed #580 , I realized, that the problem did only occur after a restart of the wsgi server. That means, after login, the part of the registry in BackendResource, which should trigger the error, did not trigger it. Maybe the registry cache and the "masking" of the root Resource (switching from FrontendResource to BackendResource as root) has something to do with it. Need further investigation.
