<b>Description</b> (I don't distinguish between collecting societies and neighbouring rights societies here)  Right now, relations to collecting societies are represented <ul style="list-style-type: none"><li>• within "creation contribution" (type: composition / performance / text)<ul style="list-style-type: none"><li>◦ relating creations and artists</li><li>◦ "rights for the performance of artist X in creation Y are represented by collecting society Z"</li></ul></li><li>• within "creation tariff category"<ul style="list-style-type: none"><li>◦ relating creations and tariff categories (Life / Reproduction / etc)</li><li>◦ "rights for the creation X in the tariff category Y are represented by collecting society Z"</li></ul></li></ul>			
<b>Questions</b> <ul style="list-style-type: none"><li>• Do we want to track the membership of collecting societies (gvl / gema / etc) as an attribute of the web user or the artist <b>in general</b>?</li><li>• I'm not sure, if all those rights related things could be modeled more straight forward or if I'm just lacking a better understanding - maybe it would be best, if we talk again.</li></ul>

#### #3 - 03/16/2019 08:51 PM - Alexander Blum

- Status changed from Feedback to Erledigt

- % Done changed from 0 to 100

It should be tracked on party level (is a member + tariff categories for gema), but also on contribution level to be able to provide the ability for fine grained customizations.
