Tracking of membership of collecting societies?

11/07/2018 12:10 AM - Alexander Blum

Status:	Erledigt	Start date:	
Priority:	Normal	Due date:	
Assignee:	Meik Michalke	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	Repertoire 2) Testing phase II	Spent time:	0.00 hour

Description

(I don't distinguish between collecting societies and neighbouring rights societies here)

Right now, relations to collecting societies are represented

- within "creation contribution" (type: composition / performance / text)
 - relating creations and artists
 - "rights for the performance of artist X in creation Y are represented by collecting society Z"
- within "creation tariff category"
 - relating creations and tariff categories (Life / Reproduction / etc)
 - "rights for the creation X in the tariff category Y are represented by collecting society Z"

Questions

- Do we want to track the membership of collecting societies (gvl / gema / etc) as an attribute of the web user or the artist **in general**?
- I'm not sure, if all those rights related things could be modeled more straight forward or if I'm just lacking a better understanding
 - maybe it would be best, if we talk again.

- Status changed from Feedback to Erledigt

- % Done changed from 0 to 100

It should be tracked on party level (is a member + tariff catories for gema), but also on contribution level to be able to provide the ability for fine grained customizations.
