Description			
<p>Nachdem Thomas mir sagte, dass ich die Emailadresse klein schreiben muss, kann ich eine andere E-mailadresse eingeben und bekomme keine Fehlermeldung nach dem Klicken auf Übernehmen. Laut Webseite wurde das Profil geändert und ich soll eine neue Registrierungsmail bekommen, die kommt aber nicht an. Weder, wenn ich eine web.de Adresse angebe, noch mit office@c3s.cc kommt es an. Und es wird nun nicht nur die E-mailadressenänderung nicht sichtbar, sondern auch die Namensänderung nicht.</p>

verification of a changed email address only works after logging out, using the frontend ressource. This again seems to be an issue with missing ressource permissions. I tried to replicate ProfileResource for verify_email without success. (Not even understanding why ProfileResource is in portal while the view is in repertoire.)
