<b>Target version:</b>	Repertoire 4) Production phase I	<b>Spent time:</b>	0.00 hour
<b>Description</b>			
we need an api to delete fingerprints from the EchoPrint server.			
Currently the solr delete_query throws an exception, finding an illegal character 0xc8.			
Tried to debug, but ptvsd has a bug too, preventing me to step through non-main threads. In ptvsd 5.0 the problem is solved, so I will wait for the release.
